## (54) SUPPLY SYSTEM FOR SPECTACLE LENS

### (57)Abstract:

**PURPOSE:** To determine a spectacle lens according to the confirmation of propriety and to provide an optimum lens edge by previously obtaining a propriety information showing whether or not lens machining including lens edge machining can be performed and confirming the propriety.

**CONSTITUTION:** A terminal computer 101 at an optician sends spectacle lens information, spectacle frame information, and prescription values to the mainframe at a factory 200 through a public communication line 300.

The mainframe 201 calculates a desired shape including a lens edge shape according to the various sent information. Then the propriety information showing whether or not the lens machining including the lens

edge machining can be performed is sent to the terminal computer 101 at the optician 100.

The terminal computer 101 displays the information, sent from a 2nd information transmitting means, on its internal image display device. Consequently, whether or not the lens machining including the lens edge machining can be performed or not can be confirmed at the optician 100.

## LEGAL STATUS

[Date of request for examination] 19.06.1997

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2982991

[Date of registration] 24.09.1999

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
